EDUCATION

Iowa State University Ames, IA — Expected May 2027

Bachelor of Science in Electrical Engineering

Relevant Coursework:

Semiconductor Materials and Devices, Energy Systems and Power Electronics, Signals and Systems 1, Electronic Circuits and Systems, Electric Circuits, Digital Logic, Embedded Systems 1, Electromagnetic Fields and Waves

In Progress:

Microwave Engineering, Communication Systems 1, Economic Systems for Electric Power Planning, Senior Design Project 1

PROJECTS

Cybot Terrain Navigation and Control (Iowa State University) April 2026 – May 2026

- Improved extended embedded C software for a Cybot mobile robot, integrating IR and ultrasonic sensors, IMU orientation data, UART communication, ADC, timers, interrupts, and PWM for navigation and control
- Designed a Python GUI for real-time robot control and communication, featuring a live map displaying the Cybot's position, detected obstacles, and target goals
- Developed robot movement controls and contributed to IMU integration, implementing directional commands and heading control for user-directed navigation
- Collaborated with teammates to integrate, test, and debug the embedded system, sensors, GUI, and communication interfaces

Signal Generator (Iowa State University) March 2025 – April 2025

- Designed a self-starting oscillator circuit generating three simultaneous square (±5V), triangle (±2V), and sine (≥1V) waves
- Simulated and validated circuit performance in LTspice before hardware implementation
- Implemented comparator-integrator topology to produce synchronized square and triangle waveforms
- Engineered a tuning range of 500Hz to 5kHz using a potentiometer-controlled RC network

Blackjack in C Programming Language (Iowa State University) March 2024 – April 2024

- Developed a command-line blackjack game in C, implementing shuffling, dealing, hit/stand, and win conditions
- Collaborated in a team of 3 to design and debug the program, ensuring correct gameplay flow and user interaction
- Created player vs computer gameplay, simulating dealer logic and enhancing user experience

WORK EXPERIENCE

Hotel Renovation – (Ames, Iowa) April 2026 - Current

General Laborer

- Performed demolition work, including removing drywall, insulation, popcorn ceilings, netting, and nails, while clearing construction debris
- Completed renovation work including drywall sanding and painting walls and ceilings
- Assisted with patio excavation, mulch installation, and general yard maintenance around property

Hegemon Group International - North Carolina August 2023 - Current

Independent Life and Health Insurance Agent

- Analyzed client needs and matched them with customized life and health solutions
- Educated clients on risk management, tax-advantaged insurance strategies, and long-term financial protection
- Maintained full compliance with insurance regulations and carrier underwriting guidelines

ReLiquidate LLC - Remote June 2025 – September 2025

Disposition Representative

- Marketed and sold real estate contracts to investors via calls, texts, and emails
- Maintained detailed records and notes in ReSimpli CRM to ensure accurate deal tracking and communication
- Tracked weekly KPIs (buyer engagement, contract to close rate, and deal volume) to optimize dispositions strategy

SKILLS

- Technical Software: C programming, MATLAB, Verilog, GitHub, SolidWorks, Microsoft Office, Arduino Uno R3, Python, Keysight's ADS
- Equipment: Oscilloscope, Power Supply, Waveform Generator, Power Tools, Circuits, Microcontrollers
- Languages: English(Native), Gujarati (Conversation/Intermediate), Hindi (Conversation/Intermediate)

ACTIVITIES

- Institute of Electrical and Electronics Engineers Iowa State (IEEE) March 2025 – Current

CERTIFICATIONS

- WorkKeys in Engineering and Accounting (Platinum) June 2023
- Quickbooks June 2023
